The completion of the restructuring process in 2020 is already delivering positive performance and accretive-capital build...

NOVO BANCO announces second consecutive profitable quarter with Net Profit of €138mn in the 1H21 (vs -€555mn in 1H20; 1Q21: €71mn; 2Q21: €67mn) with the conclusion of the restructuring process in 2020, leading to a significant profitability turnaround and Capital-accretive performance¹. **RoTE achieved a significant improvement to 8.7% in 1H21.**

Net customer loans at €23.5bn, broadly stable YTD (adj. for NPL disposal), and **deposits increasing by 3.0%**, reflecting the continued clients' confidence in NOVO BANCO while greater commercial and customer activity resulted in both an increase of **NII (+13% YoY)**, **higher fee income (+3% YoY)** and **growth in digital active customer +5.5% YoY**. **Efficiency ratio further improved to 48%** (vs 55% 1H20).

Continuous improvement in asset quality with **NPL ratio at 7.3%** (Dec-20: 8.9%; Dec-17: 28%), reflecting the continued de-risking of the balance sheet. **Coverage ratio² (Stage 3) at 55.9%** (Dec-20: 56.5%). **CoR of 68bps (vs 219bps in 1H20)**, **above run-rate given exceptional charges** (incl. €35mn Covid related provisions; 40bps when adjusted).

In Jul-21, **NB issued €300mn 3NC2 Inaugural SPN** at 3.5% and **tendered ~€161mn³** of its legacy senior unsecured bonds, **which will further help future financial performance**. This transaction is an additional sign in NB's restructuring process, **normalizing the funding structure**, through the simplification of debt instruments and investor base diversification. As of Jun-21, LCR was 150% and NSFR 112%.

...reaching high-single digit RoTE, while strengthen its value-proposition and ground for accretive and continuous growth

From Consolidated Income Before Tax to Underlying Profitability (1H2021; €mn)

Consolidated income before tax at €196mn up from -€525mn in 1H20, a clear profitability turnaround enabled by restructuring efforts over recent years.

Underlying profitability (pre-tax) reaching €138mn driven by increased Core operating income² (+28% YoY), even when excluding positive markets results (€93mn).

A solid business model delivering pre-tax RoTE¹ at 8.7%, despite the highly challenging environment.

Macroeconomic Environment

Operating in a market on ongoing recovery and a favourable outlook...

After a contraction in 1Q, **economic activity resumed the recovery in 2Q**, benefiting from favourable base effects and from a gradual reopening and normalisation of the economy.

The ongoing recovery remains unequal: **manufacturing (consumption and investment goods), retail sales and exports have recovered to pre-pandemic levels.**

Activity in services remains well below pre-pandemic levels, particularly in tourism. Overnight stays of non-resident tourists still falling close to 84% vs. 2019.

Activity growth should be supported by **favourable financing conditions**, by the **gradual reopening of the economy** and by **stronger investment, supported by the recovery and resilience plan (RRP).**

Highlights

- NII (+€34mn; +13% YoY) benefitting from the higher net interest margin given the significant progress in cost of funding reduction and stable asset pricing;
- Commissions (+€4mn; +3% YoY) driven by increased economic activity after lockdown measures in place in 1Q21 (2Q21: €72.8mn; +14.5% YoY);
- Capital Markets results of €93mn attributable mainly to investment portfolio and balance sheet management activities;
- Other Operating results includes €41mn of contributions to Resolution Funds;
- Operating Costs (-€10mn; -5% YoY) reflecting the commitment to further efficiency, improvements and business recalibration;
- Core operating income at €221mn (+28% YoY) from higher commercial banking income (+10%) and lower operating costs (-5%);
- Following an independent valuation assessment of stakes in the Restructuring Funds, in 1H20 NB booked a loss €261mn²;
- Provisions at €89mn (-€254mn YoY), includes €35mn Covid-19 related provisions, leading to CoR of 40bps (adjusted for Covid-19);
- **Net income of +€138mn (+€693mn YoY) supported by the restructuring process executed in recent years and driven by commercial activity performance.**

Lower average loan rate (-4bps YoY) given the different asset mix (-2bps) and lower rates (-2bps).

The lower YoY balance reflects mainly the discontinuation of Spanish operations, and the sale of the Carter & Wilkinson NPL portfolios (broadly stable on an adjusted basis).

Net Interest Margin evolution (%)

NII evolution (+13% on a comparable basis) benefiting from 25bps reduction of the average liability rate, that offset the evolution of the average interest rate on assets (-11bps).

There are the following differences with the Resolution Fund subject to arbitration:

Transition from the transitional regime of IFRS9, in its static option, to the full application of that standard, with the submission of a dispute to arbitration before the International Chamber of Commerce, in accordance with the CCA rules, due to the impact of that change on the calculation of the amount due by the Resolution Fund under the CCA in financial year 2019. Within this scope, it was agreed that NOVO BANCO would not proceed with the full application of IFRS9, remaining under the transitional regime until the conclusion of the arbitration proceedings. If the arbitral tribunal's decision is in favour of NOVO BANCO, the Resolution Fund shall pay the amount corresponding to the amount for the fully implemented IFRS 9, provided that the maximum amount of the CCA is not exceeded. The arbitration proceedings are ongoing and a decision by the arbitral court is expected by 4Q21

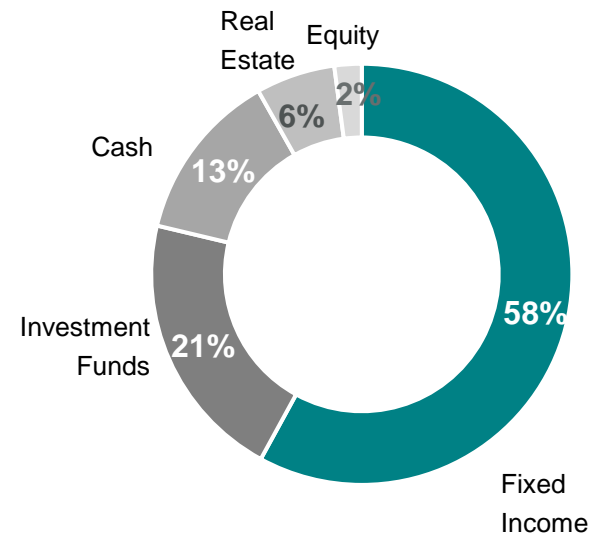

The application by the Bank, at the end of 2020, of the dynamic option of the transitional regime of IFRS 9.
